

Pico

NEW!

- > pocket-sized video magnifier
- > integrated rechargeable battery
- > four viewing modes
- > magnification from 3X to 11X

Read the fine print anytime, anywhere! Pico fits easily in your purse or pocket, and the integrated battery makes it easy to carry wherever you go. With Pico, you can even read in dimly-lit areas. Pico offers yellow on blue and positive text modes to accommodate specific vision needs. The bright display and wide viewing angle provide precise viewing and comfortable positioning.

Created for convenience, Pico adds to Optek's line of portable video magnifiers. Pico is so small you will always want it with you—shopping for greeting cards, looking at price tags in stores and reading food ingredients in the supermarket. Easily view three-dimensional objects such as pill bottles on Pico's built-in color display. Fold-down legs allow you to vary magnification, write and sign checks and tilt the screen toward you for reading.

Convenience is at your fingertips:

- > Read bills, schedules, grocery lists, receipts, menus and more in bright color.
- > Take it to the bank to read ATM instructions and transaction records.
- > Sign checks and bills, or write a quick note even when you're on the go.

Living with low vision just got easier. Wherever life takes you, equip yourself with a personal reader that goes the distance.
