

STRIX

Portable CCTV for Far Vision, Reading and Writing

At Last, the solution for the Visual Impaired! Assistance with reading, writing and far vision have now been uniquely combined in The STRIX.

The STRIX will facilitate a wide range of activities, enhancing independence of the user.

The STRIX is a handheld, full color electronic magnifier with an integrated 7" TFT display and an auto-focus camera. The STRIX will enable the user to carry out a host of everyday tasks: reading newspapers and books, consulting timetables at stations and airports, reading text on consumer products in shops, or participating actively in business meetings and presentations at work. With an optional stand, The STRIX can replace large auto-focus video magnifiers.
